GRADE domain ratings and evidence certainty

Symbols show how seriously each domain was downgraded, from not serious to very serious.

Bodies of evidence

O1	AF detection, sensitivity — LLM, patient level
O2	AF detection, specificity — LLM, patient level
O3	AF detection, sensitivity — ECG models, segment level
O4	AF detection, specificity — ECG models, segment level
O5	AF classification, F1 — knowledge-based models
O6	AF recurrence from EHR text — sensitivity & specificity
O7	Future AF prediction — discrimination (AUROC)
O8	Calibration, net benefit, decision impact
